To Wayne Western

As requested to contact you by letter dated 8/22/2016 by Paul B. Baker (Minerals Program Manager Div. oil gas and mining), I am unable to do any reclamation so I would ask you people to do it but keep in mind that area was turn into a public pit many years ago and after paying many years of \$500 a year for a large permit which I thought was a 50 acre mining permit oil gas and mining drop it to a 5 acre (but of course never return any of my funds) and I was paying \$150 for the area which was a public pit. So please do what you think is right so I can get a much of my money back as possible.

Thank You

George Finnegan
